Election/Restrictions

Applicant's election without traverse of Group I, Claims 1-26 in the reply filed on 2-10-2005 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 recites the limitation "the controller" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 26 recites the limitation "the image" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 24-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lorenz et al.(U.S>Pat.6,697,654).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lorenz in view of Barbato(U.S.Pat.6,728,571). Lorenz discloses a targeted interference subtraction applied to near-infrared measurement on analysis that shows many of the features of the claimed invention. Barbato discloses an electronically scanned optical coherence tomography with frequency modulated signals that shows a analog to digital converter coupled to an ultrasound console. It would have been obvious to modify the Lorenz reference with such a feature so as to encode a motor or other element.

Allowable Subject Matter

Claims 10-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wyatt, Pologe and Hochman(six references) are cited to show structure and methods similar to the claimed invention.
